

HIV and Aboriginal communities – the differences

A higher proportion of new HIV diagnoses for Aboriginal and Torres Strait Islander people is due to injecting drug use and heterosexual sex compared to diagnoses for non-Indigenous people born in Australia.

Australian-born non-Indigenous

Aboriginal and Torres Strait Islander

■ MALE-TO-MALE SEX ■ MALE-TO-MALE SEX & INJECTING DRUG USE ■ HETEROSEXUAL SEX
■ INJECTING DRUG USE ■ OTHER / UNDETERMINED
